

include/beecrypt/sha1.h

```
graph BT; fips186["include/beecrypt/fips186.h"] --> sha1["include/beecrypt/sha1.h"]; hmacsha1["include/beecrypt/hmacsha1.h"] --> sha1; sha1 --> shalopt["include/beecrypt/shalopt.h"];
```

The diagram illustrates the include relationships between four header files in the beecrypt library. At the top is a grey box labeled 'include/beecrypt/sha1.h'. Below it are three white boxes: 'include/beecrypt/fips186.h' on the left, 'include/beecrypt/hmacsha1.h' in the center, and 'include/beecrypt/shalopt.h' on the right. Blue arrows point from the bottom-left box to the top box, from the bottom-center box to the top box, and from the top box to the bottom-right box.
